850 SERIES

HEAT SHRINK TUNNELS

HIGH EFFICIENCY HEAT TRANSFER

Unique recirculating bottom air flow heat transfer system envelops the product with hot air quickly and efficiently providing optimum shrink wrapping at the lowest possible cost. An exceptional value, each tunnel in the 850 series offers such standard features as high efficiency finned rod heating elements, a fully insulated heat chamber, heavy duty conveyor, and height adjustable consoles that include casters and levelers.

Standard Features:

All 850 Series Heat Shrink Tunnels

- Fully insulated heat chamber
- Variable speed conveyor
- Digital precision temperature control
- Automatic cool down
- High efficiency finned rod heating elements
- Bottom air flow heat transfer system
- USDA approved

850 Heat Shrink Tunnel

- Chamber opening - 15"W x 28"L x 8"H (38cm x 71cm x 20cm)
- Variable speed 48"L Teflon mesh belt conveyor (0 to 70 FPM)
- 220V, single phase, 29 amp
- 6000 watts of heating power
- Overall dimensions 48"L x 22"W (122cm x 56cm)
- Approximate shipping weight - 225 lbs. (102kgs.)

851 Heat Shrink Tunnel

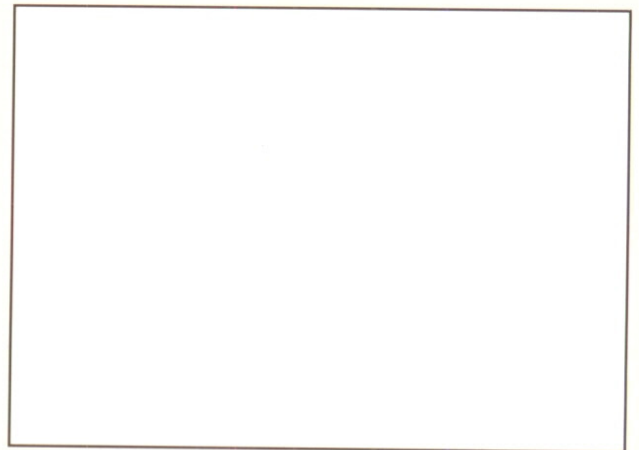

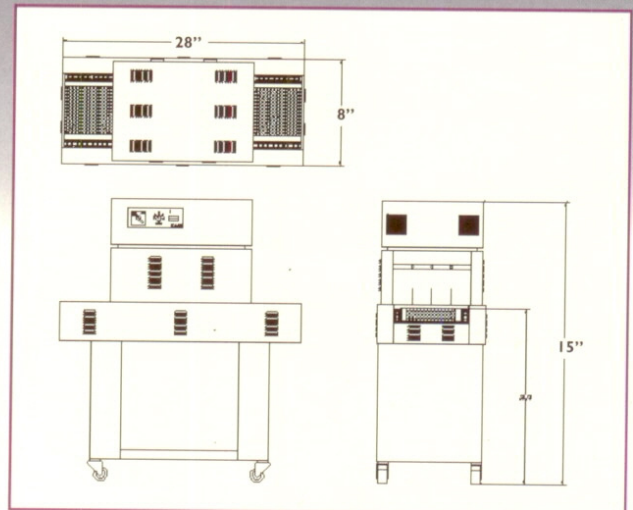

- Chamber opening - 15"W x 28"L x 8"H (38cm x 71cm x 20cm)
- Variable speed 48"L quick adjusting live/dead roller conveyor (0 to 70 FPM)
- 220V, single phase, 29 amp
- 6000 watts of heating power
- Overall dimensions 48"L x 22"W (122cm x 56cm)
- Approximate shipping weight - 255 lbs. (116kgs.)

852 Heat Shrink Tunnel

- Chamber opening - 21"W x 28"L x 10"H (53cm x 71cm x 25cm)
- Variable speed 48"L quick adjusting live/dead roller conveyor (0 to 70 FPM)
- 220V, single phase, 29 amp
- 6000 watts of heating power
- Adjustable console stand (32" to 36" from the floor) with casters and levelers
- Overall dimensions 48"L x 28"W x 53" - 57"H (122cm x 71cm x 135cm - 145cm)
- Approximate shipping weight - 400 lbs. (181kgs.)

Optional Features:

- 1.5" and 1" Roller spacing (851 and 852 only)
- Teflon mesh belt overlay for 851 and 852
- Console stand with casters and levelers for 850 and 851
- Directional air controls
