

# Packaging Aids Constant Heat Sealer PB

## PB Constant Heat Sealer

The PB constant heat sealer is designed for sealing MIL spec barrier bags, coated paper, film and foil laminates, and other multi-layer materials. It comes with a constantly heated upper jaw that is adjustable to 550°F. The head can be rotated from horizontal to vertical for ease of product handling. The optional stainless steel work shelf and bag support simplify bag positioning by supporting product during processing.

### Standard Features and Benefits PB

- 3/4" seal width
- Seal lengths: 12" to 48"
- Independently controlled rotary switch timers for seal and cool.
- Analog pressure gauge for monitoring seal pressure
