SUPER MUTT

SPV-18

Shown with optional workshelf

OPTIONS

- Seal only
- Gas Flush/Purge
- 220 Volt
- Plus many more

ACCESSORIES

- Repair Kit
#SPK1800SM
- Barrier Bags
- Work Shelf
#AC801
- Tuning

Retractable Nozzle

- Increased productivity:
A greater sustained vacuum flow means production speed will increase

Dual Seal Bars

- Greater versatility:
Full .025 inch top and bottom impulse seal system, seals a wide range of products — from light-weight polyethylene to tough metalized barrier materials

Self-Contained Compressor

- Increased mobility:
Self-contained compressor, eliminates the need for access to factory air outlets. This unit can be used where and when it's needed — all that is required is an electrical outlet

Stainless Steel Nozzle and Metal Construction

- Longer life:
Lightweight all-metal construction and stainless steel nozzles ensures many years of quality performance.

Features and specifications subject to change without notice.
